DIVISION 7 SUPPLY

Welcome To DIVISION 7 SUPPLY

TABLE OF CONTENTS

where we treat customers like family and provide high quality roofing and insulation materials at competitive prices for the building industry. Opening in 2008, Division 7 Supply is one of the most reliable and comprehensive building supply companies in the Southeast. Our Leadership team has over 100 years of combined experience in the construction industry and a passion for getting your project completed **On Time and Right The First Time.**

Along with roofing and insulation, Division 7 Supply also specializes in custom metal fabrication. We are committed to quality workmanship, competitive pricing and professional integrity in every project we do. We take pride in our innovative solutions to today's complicated construction problems and our ability to adapt to an ever-changing industry.

Within each product division, we offer a variety of brands to suit your budgetary needs and design preference. We like to partner with our customers and help them with their business - we are not looking for that one-time sale. Before every order is shipped out, it goes through our 5-point check system to insure your order is correct. For those customers who prefer to pick-up their order, we offer free drinks and popcorn.

We look forward to the opportunity to serve you now and for many years to come.

Formaldehyde-free™ Insulation Products

Johns Manville products have a difference you can see. With the only complete line of certified Formaldehyde-free™ fiberglass insulation products, it's a difference in performance and quality that you'll only get with Johns Manville. Johns Manville offers more than just standard kraft and unfaced batts; we offer innovative solutions with our fiberglass insulation. Whether you're building a new structure or retrofitting an existing home, each of our insulation products is tested and proven to provide superior performance and energy efficiency for the life of a home.

INSULATION PRODUCTS

Unfaced

Unfaced batt insulation does not have a vapor retarder. Ideal for insulating interior walls for sound control and re-insulating attics.

Kraft-Faced

Kraft-Faced batt insulation has a standard vapor retarder that is easily cut to fit the cavity.

ComfortTherm®

ComfortTherm® batt insulation is wrapped in plastic for a more comfortable installation with less itch and dust. The plastic encapsulation also serves as a vapor retarder.

DIVISION 7 SUPPLY

Fiberglass Insulation

CUSTOM INSULATION SYSTEMS

INSULATION PRODUCTS

The Johns Manville Custom Insulation System uses spray-in and blown-in methods for a custom insulation fit in every size and shape of framing. That means no hot or cold spots, so you get superior thermal performance, better sound control and more effective moisture management throughout every part of your home.

The JM Custom Insulation System creates a customized, complete thermal envelope and more.

JM SPIDER®

JM Spider® fiberglass insulation is combined with an adhesive that allows the installer to spray the insulation into the cavity providing a custom fit. The insulation is sprayed in virtually dry so drywall can be installed right away. Fills all gaps and voids for superior thermal, acoustical and moisture management performance.

JM CLIMATE PRO®

JM Climate Pro® fiberglass insulation is blown into attics, nonconforming spaces and hard-to-reach areas, like corners, edges and around framing. When it's applied to the recommended thickness, you can be assured that your home is energy efficient, with minimal heat loss. It won't decay or provide food for animals, insects or microbes.

FEATURES

- Thermal protection up to R-15 in 2x4 framing or R-23 in 2x6 framing
- Sound control that only gap-free coverage can provide
- No drying time needed, even when installed with adhesive; won't absorb or hold moisture later
- Natural mold resistance; available with a mold inhibitor for extra protection for your insulation investment
- Fire resistance, because it's made from non-combustible glass
- And it can be used in both new construction and retrofit applications

Cellulose Insulation

Cellulose insulation is a loose-fill product that is manufactured from recycled wood products, various paper products (primarily newspaper), for use in various blown in applications such as attics and wall cavities. The product is chemically treated to make it fungi resistant and fire retardant.

Greenshield Stabilized Attic Spray (26lbs bag)		
R-Value	Thickness	Coverage SF/Bag

R50	14.1"	19.2

Mineral Wool (SAFB)

Mineral wool fiber insulations are made from basalt rock and slag. This combination results in a non-combustible, sound attenuation product with a melting point of approximately 2150 °F, which gives it excellent fire resistance properties. Mineral wool is a water repellent yet vapor permeable material.

DIVISION 7 SUPPLY

Spray Foam

JOHNS MANVILLE OPEN CELL SPRAY FOAM

SPECIFICATIONS

- 16,000-18,000 board feet/set
- 950 lbs/set

Johns Manville Corbond® Open-cell Spray Foam is a lower density, nonstructural insulation that offers an R-Value of R-3.8 per inch. It delivers high yield, minimizes sound transmission and virtually eliminates any air leakage. It's designed to improve energy efficiency for a wide variety of residential, commercial and industrial applications and can act as an effective air barrier.

ADVANTAGES

- **Energy-Efficient:** Helps to improve energy efficiency by filling in gaps and cracks while creating an air seal.
- **Air Barrier:** Air-impermeable at 3.75".
- **Sound Transmission:** Performs well acoustically when used in an assembly.
- **Installation:** Provides high yield with superior spray-ability at an exceptional value and low odor. Meets requirements for application without an ignition barrier attics and crawl spaces.

JOHNS MANVILLE CORBOND OPEN CELL APPENDIX X

SPECIFICATIONS

- 15,000-16,000 board feet/set
- 1,000 lbs/set

Johns Manville Corbond® Open-cell Appendix X Spray Foam provides an R-Value of R-3.7 per inch, and meets AC 377 NFPA 286 Appendix X requirements for application without an ignition barrier in attics and crawl spaces. This low-density, nonstructural insulation allows for high yield while providing excellent heat, air and sound control. Recommended for use in residential, commercial and industrial applications.

ADVANTAGES

- **Energy-Efficient:** Helps to improve energy efficiency by filling in gaps and cracks while creating an air seal.
- **Air Barrier:** Air-impermeable at 3.5".
- **Sound Transmission:** Performs well acoustically when used in an assembly.
- **Installation:** Provides high yield with superior spray-ability at an exceptional value and low odor. Meets requirements for application without an ignition barrier attics and crawl spaces.

JOHNS MANVILLE CORBOND III® CLOSED CELL SPRAY FOAM

Johns Manville Corbond III® closed-cell spray polyurethane foam insulation offers an R-Value of R-7 per inch and can be applied in a single pass to a maximum of 3.5 inches, providing superior thermal performance with seamless air sealing and moisture control in a single step. Multiple immediate passes, with no wait time, may also be applied. With high yield and excellent adhesion, it's an ideal choice for high-performing energy efficient commercial, residential and industrial applications.

ADVANTAGES

- **Complete Coverage:** Expands and adheres without shrinking or settling.
- **Energy-Efficient:** Reduces air and moisture infiltration to the building envelope and provides continuous coverage for high thermal performance.
- **Air Barrier:** Prevents leaks when installed at 1" thickness or more.
- **Moisture Performance:** Resists mold growth; meets current vapor retarder codes.
- **Wide Application Temperature Range:** Can be applied between 20°F and 120°F, delivering consistent performance with seasonal versatility.
- **Faster Installation:** Spray easily in a single pass from a minimum of .5" to a maximum of 3.5". Multiple immediate passes, with no wait time, may also be applied.
- **Commercial Approvals:** NFPA 285 assembly approvals. Appendix X approval for application in unoccupied attics and crawl spaces without a prescriptive ignition barrier or coating.

SPECIFICATIONS

- 5,100-5,200 board feet/set
- 1,000 lbs/set

INSULATION ACCESSORIES

NT Radiant Barrier

Radiant Barrier for attics is a perforated sheet made up of a single layer of polyethylene reinforcing scrim, bonded to – and sandwiched between – two highly reflective metalized sheets.

ITEM NO.	DESCRIPTION	UNITS
AYR-FOILRB	4' x 250' NT Radiant Barrier	Roll

Reflective Single Bubble Insulation

Reflective Insulation is a single layer of polyethylene bubbles, sandwiched between two highly reflective surfaces. Typical system R-values incorporating Reflective Insulation, range from R-6.1 to R-14.7, and all products in this line are Class 1/Class A in accordance with the ASTM E84 fire test standard. In addition to increasing the thermal resistance of a building envelope, our bubble-core products are approved vapor barriers.

FEATURES

- Class 1 / Class A Fire Rating
- Available in Square Edge, Quick Seam or Tab Two
- Unaffected by moisture & humidity
- Radiant and vapor barrier all-in-one
- Reflects 94% of radiant heat

ITEM NO.	DESCRIPTION	UNITS
AYR-FOILSB	4' x 125' Single Bubble Radiant	Roll

DC-315 Thermal Barrier - Ignition Barrier (Ice Gray)

DC-315 is an interior ignition or thermal barrier coating for polyurethane spray foam insulation. Depending on your particular application, an ignition thermal barrier is required by the Building Code. DC-315 is a water based latex system that dries quickly and reaches maximum properties in less than 14 days. Requires an airless sprayer with a minimum of 1 GPM or 3300 PSI and a tip size between 525 and 529.

Acceptable
Thermal Barrier
over Spray Foam

Thermal Barrier Coverage:

450 Sq Ft Per 5 Gallons
at 18 Mills Thick Wet
(or 12 Mills Thick Dry)

ITEM NO.	DESCRIPTION	UNITS
588-6627	DC-315 Thermal-Ignition Barrier	5 Gallons

Ignition Barrier Coverage:

650 Sq Ft Per 5 Gallons at 12 Mills Thick Wet (or 8 Mills Thick Dry)

Draft Cap

Made of durable dust-free expanded polystyrene foam, the Draft Cap will reduce heat loss and heat gain and help you save on your heating and cooling bills. Lightweight and easily installed in less than 5 minutes, the Draft Cap attic stair insulator satisfies all current energy building codes for insulation over the attic access panel with an R-value of 11.

ITEM NO.	DESCRIPTION	UNITS
ASC	Draft Cap Attic Stair Insulator	7 / Pallet

Draftmaster® Attic Cover Insulator

Draftmaster® Attic Cover is made of highly reflective thermal radiant barrier. This attic stairway insulator is light, thin, and effective, reflecting up to 96% of radiant heat and sealing gaps. It has heavy-duty zippers to allow easy access to the attic, and the cover helps to keep valuable heated and cooled air in the living space where your customers want it. Offers R-Value of 15.

ITEM NO.	DESCRIPTION	UNITS
AI542616	Draftmaster Attic Cover 26" x 54" x 12"	Each
AI5422	Draftmaster Attic Cover 22" x 54" x 12"	Each

Insulation Wire Supports (tiger teeth)

13 guage spring wire supports are an economical way to install roll and batt insulation in floors, walls and ceilings. Boxed 500 per carton.

Vapor Barrier Skrim

Scrim Reinforced Laminate. Used for more demanding applications requiring high tear resistance. A heavy scrim reinforcement placed between plies greatly enhances tear resistance and increases service life.

ITEM NO.	DESCRIPTION	UNITS
DS1212100BKWH	12 Mil Vapor Barrier Skrim (12'x100' White/Black)	Roll
DS812100BKWH	8 Mil Vapor Barrier Skrim (12'x100' White/Black)	Roll
VBTAPE	Vapor Bond Tape 4"x210'	Roll

Polystyrene Baffles & Cardboard Baffles

ITEM NO.	DESCRIPTION	UNITS
BAFF	Polystyrene Baffles	50/Bundle
CBAFF1623	Cardboard Baffles 16" OC x 23" Long	50/Bundle
CBAFF2423	Cardboard Baffles 24" OC x 23" Long	50/Bundle

Meyer Versa Vac

Designed for fast, profitable removal of insulation from attics, sidewalls and crawl spaces. Removes blown-in insulation and plaster chips - wet or dry. Attaches easily to vacuum bags. **For rent locally or for sale.**

ITEM NO.	DESCRIPTION	UNITS
MEYERVAC19HP	Meyer Versa Vac 19hp	Each

Dura-III Stilts

The Dura-III is the finest leg extension device ever produced. It combines the best innovative design concepts and technology. It features a steel insert at the adjustment screw location and field replaceable nylon leg sleeves. No matter what trade you are in, if you have a need for movement at elevated heights, you owe it to yourself to consider the Dura-III. You'll find yourself accomplishing more with less effort.

ITEM NO.	DESCRIPTION	UNITS
	Dura-III 14" to 22" Adjustable	Pair
	Dura-III 18" to 30" Adjustable	Pair
	Dura-III 24" to 40" Adjustable	Pair

Hose, Parts & Blowing Machines

Blowing Hose

ITEM NO.	DESCRIPTION	UNITS
TLH2550P	2-1/2" x 50' Blowing Hose	Each
TLH350P	3" x 50' Blowing Hose	Each
TLH3550P	3-1/2" x 50' Blowing Hose	Each
MK4050	4" x 50' Blowing Hose	Each

Nozzles, Connectors, Reducers & Clamps

ITEM NO.	DESCRIPTION	UNITS
Call	Swivel Nozzle, 2-1/2" Hose to 2"	Each
Call	Connector, Steel, For 2", 2-1/2", 3", 3-1/2", 4" Hose	Each
Call	Reducer, Steel	Each
TLHC25	Hose Clamp Fits 2" to 3-1/2"	Each
TLHC03	Hose Clamp 3"	Each
TLHC04	Hose Clamp Fits 3" to 4"	Each

INSULATION ACCESSORIES

Insulation Blowing Machines: Wasp or AttiCat

The Wasp

The Wasp literally does it all. With a cellulose production rate of 1750 pounds per hour (75 bags per hour) and a fiberglass rate of 475 pounds per hour (18 bags per hour), it can easily insulate a 1000 square foot attic in less than an hour.

AttiCat

The AttiCat Insulation Blowing machine works with any blown-in fiberglass. The machine breaks up the insulation so you can easily blow the material into the attic, thus reducing the heating and cooling costs.

ITEM NO.	DESCRIPTION	UNITS
	The Wasp Insulation Blowing Machine	Each
	AttiCat Insulation Blowing Machine	Each

Vacuum Bags

Made of 100% polypropylene. Bag dimensions are 70" long x 48" diameter, with a 12" neck that is 10" in diameter. Bag capacity is 75 cubic feet per bag. (10) bags per box. (For an approximate calculation of bags you will need, assume 1 bag for every 200 square feet of 6" deep loose-fill insulation.)

ITEM NO.	DESCRIPTION	UNITS
450TB049	Vacuum Bags	Each

Disposable Dust Masks

ITEM NO.	DESCRIPTION	UNITS
789-7259	8210 N95 Dust Mask No Valve 3M	20 / Box
3M8511V/3M8511	Dust Mask with Valve	10 / Box

Full Facepiece Respirators

ITEM NO.	DESCRIPTION	UNITS
3M501	3M501 Half Face Respirator Retainer	Each
3M6900	3M Full Face Respirator	Each
124-9739	3M Pre Filters O/V Cartridge	3 Pair/Pk
3M8511V	3M8511 Dust Mask with Valve	10/Box
471-8185	3M69P71 Full Face Respirator Large P95	Each
475-1491	3M68P71 Full Face Respirator Medium P95	Each
573-4298	3M O/V Cartridges	2 Pair/Box
789-7259	3M8210 N95 Dust Mask	20/Box

Advanz Spray Goggles

ITEM NO.	DESCRIPTION	UNITS
155-4021	Advanz Spray Goggles	Each
489-4630	Advanz Lens Covers	Each

Spray Socks

ITEM NO.	DESCRIPTION	UNITS
100-4217	Stretch Spray Socks	6 Pack

Gloves

ITEM NO.	DESCRIPTION	UNITS
126-WG	Blue Dipped Wonder Gloves	Pair
NIGLPP100	Nitrile Gloves	90 / Box
