DIVISION 7 SUPPLY

Welcome To
DIVISION 7 SUPPLY

where we treat customers like family and provide high quality wildlife, roofing and insulation materials at competitive prices for the building industry. Since 2008, Division 7 Supply is one of the most reliable and comprehensive building supply companies in the Southeast. Our Leadership team has over 100 years of combined experience in the construction industry with a passion for getting your project completed **On Time and Right The First Time**.

Along with wildlife and insulation products, Division 7 Supply also specializes in custom metal fabrication. We are committed to quality workmanship, competitive pricing and professional integrity in every project we do. We take pride in our innovative solutions for today's complicated construction problems and our ability to adapt to an ever-changing industry.

Within each product division, we offer a variety of brands to suit your budget and design preference. We like to partner with our customers and help them with their business; we are not looking for that one-time sale. Before every order is shipped out, it goes through our 5-point check system to insure it is correct. For those customers who prefer to pick-up their order, we offer free drinks and popcorn.

We look forward to the opportunity to serve you now and for many years to come.

Custom Metal Fabrication

Division 7 Supply has its own metal fabrication shop. Give your customers home or next project an extra special touch with custom metal fabrication. If you need a chimney pan, shroud or masonry cap we can do it. Or if you need a customer piece of metal bent we can do that too. For more details on custom fabricated shapes, please give our office a call or go online for our custom metal order form.

Leaf Supreme® "The Next Generation of Gutter Protection"

Leaf Supreme and Leaf Supreme-Pro keep the gutters free of leaves and debris. This system also prevents birds, rats, squirrels and other animals from entering the roofline.

- Comes in 4' lengths
- Manufactured using sturdy 0.024 aluminum

Leaf Rejector® "The Best Economical Gutter Guard"

- Made from durable 0.019 thick aluminum
- Diamond flow hole & water overflow channel
- 5" or 6" by 6 feet wide

Critter Proof by Leaf Supreme® - Gutter & Fascia Guard

- Adjustable design provides coverage of fascia gap, gutter protection and maintain attic ventilation
- 5" or 6" by 6 feet wide

INSULATION PRODUCTS

JM Johns Manville

Formaldehyde-free™ Insulation Products

Johns Manville products have a difference you can see. With the only complete line of certified Formaldehyde-free™ fiberglass insulation products, it's a difference in performance and quality that you'll only get with Johns Manville. Johns Manville offers more than just standard kraft and unfaced batts; we offer innovative solutions with our fiberglass insulation. Whether you're building a new structure or retrofitting an existing home, each of our insulation products is tested and proven to provide superior performance and energy efficiency for the life of a home.

Unfaced
Unfaced batt insulation does not have a vapor retarder. Ideal for insulating interior walls for sound control and re-insulating attics.

Kraft-Faced
Kraft-Faced batt insulation has a standard vapor retarder that is easily cut to fit the cavity.

ComfortTherm®
ComfortTherm® batt insulation is wrapped in plastic for a more comfortable installation with less itch find dust. The plastic encapsulation also serves as a vapor retarder.

JM Johns Manville

CUSTOM INSULATION SYSTEMS

The Johns Manville Quality Wildlife and Insulation System uses blown-in methods for a custom insulation fit in every size and shape of framing. That means no hot or cold spots, so you get superior thermal performance, better sound control and more effective moisture management throughout every part of your home.

Along with quality wildlife and insulation, the JM Custom Insulation System creates a customized, complete thermal envelope and more.

FEATURES

- Thermal protection up to R-15 in 2x4 framing or R-23 in 2x6 framing

- Sound control that only gap-free coverage can provide

- No drying time needed, even when installed with adhesive; won't absorb or hold moisture later

- Natural mold resistance; available with a mold inhibitor for extra protection for your insulation investment

- Fire resistance, because it's made from non-combustible glass

- And it can be used in both new construction and retrofit applications

JM CLIMATE PRO®

JM Climate Pro® fiberglass insulation is blown into attics, nonconforming spaces and hard-to-reach areas, like corners, edges and around framing. When it's applied to the recommended thickness, you can be assured that your home is energy efficient, with minimal heat loss. It won't decay or provide food for animals, insects or microbes.

INSULATION PRODUCTS

Cellulose Insulation

Cellulose insulation is a loose-fill product that is manufactured from recycled wood products, various paper products (primarily newspaper), for use in various blown in applications such as attics and wall cavities. The product is chemically treated to make it fungi resistant and fire retardant.

Greenshield Stabilized Attic Spray (26lbs bag)		
R-Value	Thickness	Coverage SF/Bag
R13	3.7"	101.1
R19	5.4"	63.3
R30	8.50"	36.0
R38	10.7"	26.9
R50	14.1"	19.2

Mineral Wool (SAFB)

Mineral wool fiber insulations are made from basalt rock and slag. This combination results in a non-combustible, sound attenuation product with a melting point of approximately 2150°F, which gives it excellent fire resistance properties. Mineral wool is a water repellent yet vapor permeable material.

Meyer Versa Vac

Designed for fast, profitable removal of insulation from attics, sidewalls and crawl spaces. Removes blown-in insulation and plaster chips - wet or dry. Attaches easily to vacuum bags. **For rent locally or for sale.**

ITEM NO.	DESCRIPTION	UNITS
MEYERVAC19HP	Meyer Versa Vac 19hp	Each

Vacuum Bags

Made of 100% polypropylene. Bag dimensions are 70" long x 48" diameter, with a 12" neck that is 10" in diameter. Bag capacity is 75 cubic feet per bag. (10) bags per box. (For an approximate calculation of bags you will need, assume 1 bag for every 200 square feet of 6" deep loose-fill insulation.)

NT Radiant Barrier

Radiant Barrier for attics is a perforated sheet made up of a single layer of polyethylene reinforcing scrim, bonded to – and sandwiched between – two highly reflective metalized sheets.

ITEM NO.	DESCRIPTION	UNITS
AYR-FOILRB	4' x 250' NT Radiant Barrier	Roll

Reflective Single Bubble Insulation

Reflective Insulation is a single layer of polyethylene bubbles, sandwiched between two highly reflective surfaces. Typical system R-values range from R-6.1 to R-14.7, and all products in this line are Class 1/Class A in accordance with the ASTM E84 fire test standard. In addition to increasing the thermal resistance of a building envelope, all of these bubble-core products are approved vapor barriers.

FEATURES
- Class 1 / Class A Fire Rating
- Available in Square Edge, Quick Seam or Tab Two
- Unaffected by moisture & humidity
- Radiant and vapor barrier all-in-one
- Reflects 94% of radiant heat

ITEM NO.	DESCRIPTION	UNITS

Draft Cap

Made of durable dust-free expanded polystyrene foam, the Draft Cap will reduce heat loss and heat gain and help you save on your heating and cooling bills. Lightweight and easily installed in less than 5 minutes, the Draft Cap attic stair insulator satisfies all current energy building codes for insulation over the attic access panel with an R-value of 11.

ITEM NO.	DESCRIPTION	UNITS
ASC	Draft Cap Attic Stair Insulator	7 / Pallet

Draftmaster® Attic Cover Insulator

Draftmaster® Attic Cover is made of highly reflective thermal radiant barrier. This attaic stairway insulator is light, thin, and effective, reflecting up to 96% of radiant heat and sealing gaps. It has heavy-duty zippers to allow easy access to the attic, and the cover helps to keep valuable heated and cooled air in the living space where your customers want it. Offers R-Value of 15.

VPTAPE	Vapor Bond Tape 4" x 210'	Roll

Insulation Blowing Machines

The Wasp

The Wasp literally does it all. With a cellulose production rate of 1750 pounds per hour (75 bags per hour) and a fiberglass rate of 475 pounds per hour (18 bags per hour), it can easily insulate a 1000 square foot attic in less than an hour.

AttiCat

The AttiCat Insulation Blowing machine works with any blown-in fiberglass. The machine breaks up the insulation so you can easily blow the material into the attic, thus reducing the heating and cooling costs. We carry Johns Manville Climate Pro insulation for sale separately. Rental includes 100 ft hose and 1 power cord.

SAFETY PRODUCTS

DIVISION 7 SUPPLY

Division 7 Supply offers a range of building supplies and services to meet your project needs and budget. Call or stop by to discuss our complete line of products.

INSULATION

From Fiberglass to Spray Foam to Cellulose we offer virtually all types of insulation. Whether it is our stock of over 50 SKU's of Johns Manville fiberglass, Open or Closed Cell Spray Foam, Attic or Wall Spray Cellulose or Dow board we'll have it. We also carry one of the broadest selections of accessories to go along with it.

CUSTOM METAL FABRICATION

We are the only roofing distributor in the Southeast that also has its own metal fabrication shop. We specialize in making Chimney Pans, Shrouds and Masonry Caps. We take pride in our ability to turn ugly chimneys into impressive design pieces. If you're local we are also proud to offer Turn-key service on our custom chimney toppers.

ROOFING

If it's residential steep slope roofing Division 7 Supply is who you need to call. We carry a huge line of Certainteed and Tamko, Architectural and 3 tab shingles. If you need roofing materials we have all the supplies to help you fulfill your job. From underlayment's, to peel & stick modified, to fall protection kits, we'll have it.

WINDOWS

We offer new construction, replacement windows, sash kits. With Ply Gem, "It's not just a window it's a whole new point of view."
